Natural Gas Production & the Environment

When: Monday
June 10, 2013
10:00 a.m

Where: PUC
Hearing Room A

GUEST SPEAKERS

Both Speakers participate in The Center for Sustainable Shale Development (CSSD). CSSD is a collaboration of environmental organizations, philanthropic foundations, energy companies and other stakeholders committed to safe, environmentally responsible shale resource development.

Mr. Andrew Place is Corporate Director of Energy & Environmental Policy at EQT Corporation. EQT is one of the country's largest natural gas exploration and production companies. EQT describes itself as a leader in developing and implementing innovative drilling technology to effectively and efficiently tap into unconventional natural gas reservoirs, such as shale, tight sands, and coalbed methane. Mr. Place holds a B.S. in Economics from the University of Pittsburgh and an M.S. in Public Policy and Management from the H. John Heinz III College at Carnegie Mellon.

Dr. Bruce Hill is a Senior Scientist and geologist with the Clean Air Task Force (CATF.) CATF works to help safeguard against the worst impacts of climate change. Dr. Hill serves as a technical specialist for geologic carbon sequestration, shale gas development and on developing policies for public health and regional haze. Dr. Hill has several decades of experience in air pollution research, writing on the health, environmental and climate impacts of particulate emissions from power plants and diesel engines. Dr. Hill received his B.A. in Geology from University of Vermont and his Ph.D. in Geology from the Stanford University.
